CLAIMS

- A wearable article comprising an outer cover adapted to fit about a portion of a wearer and a fever indicator
 affixed to the outer cover, wherein the fever indicator provides a visible, audible, or tactile signal when a
 wearer's body temperature is above a predetermined threshold temperature, the fever indicator determining
 the wearer's body temperature from urine expelled from the wearer's body.
- 2. The wearable article of Claim 1 wherein the fever indicator provides a qualitative indication of a fever.
- 3. The wearable article of Claim 2 wherein the fever indicator comprises a temperature indicating component.
- 4. The wearable article of Claim 2 wherein the fever indicator comprises at least one of a urine sensitive component and a temperature sensitive component.
- 5. The wearable article of Claim 1 wherein the fever indicator provides a quantitative indication of a fever.
- 6. The wearable article of Claim 1 wherein the fever indicator is disposed on a carrier element.
- 7. The wearable article of Claim 4 wherein the urine sensitive component dissolves upon contact with urine.
- 8. The wearable article of Claim 1 wherein the fever indicator signals a fever only when urine is present in the article and the temperature in at least a portion of the article is above a preset threshold.
- 9. The wearable article of Claim 1 wherein the fever indicator comprises a plasticizer.
- 10. A disposable absorbent article for receiving and containing bodily exudates, the disposable absorbent article comprising:
 - an outer cover adapted to fit about a portion of a wearer;
 - a fluid permeable topsheet;
 - an absorbent structure disposed adjacent at least a portion of the outer cover; and
 - a fever indicator affixed to a component of the disposable absorbent article, wherein the fever indicator provides a visible, audible, or tactile signal when a wearer's body temperature is above a predetermined threshold temperature, the fever indicator determining the wearer's body temperature from urine expelled from the wearer's body.
- 11. The disposable absorbent article of Claim 10 wherein the fever indicator is disposed on at least a portion of the topsheet.
- 12. The disposable absorbent article of Claim 11 wherein the fever indicator is detachable from the topsheet.

- 13. The disposable absorbent article of Claim 10 wherein the fever indicator provides a qualitative or quantitative indication of a fever.
- 14. The disposable absorbent article of Claim 10 wherein the fever indicator comprises a temperature indicating component.
- 15. The disposable absorbent article of Claim 10 wherein the fever indicator comprises at least one of a urine sensitive component and a temperature sensitive component.
- 16. The disposable absorbent article of Claim 10 wherein the fever indicator is disposed on a carrier element.
- 17. The disposable absorbent article of Claim 10 wherein the fever indicator signals a fever only when urine is present in the article and the temperature in at least a portion of the article is above a preset threshold.
- 18. The disposable absorbent article of Claim 10 wherein the fever indicator comprises a plasticizer.
- 19. An insert for use with a wearable article, the insert comprising a fever indicator comprising;
 - a temperature indicating component; and
 - a carrier, wherein the fever indicator is affixed to a component of the wearable article, wherein the fever indicator provides a visible, audible, or tactile signal when a wearer's body temperature is above a predetermined threshold temperature, the fever indicator determining the wearer's body temperature from urine expelled from the wearer's body.
- 20. The insert of Claim 19 wherein the fever indicator further comprises at least one of a urine sensitive component and a temperature sensitive component.
